Dr. Joshua Lederberg  
Department of Genetics  
University of Wisconsin  
Madison 6, Wisconsin

Dear Dr. Lederberg:

I am sending you a few reprints that are still available covering some of our early work on bacterial variation. Frankly I hesitate very much to do so because things have changed so much since I was interested in this subject in a serious way. I am really somewhat ashamed at not having done this or that at the time I was working on these problems.

Sincerely yours,  
  
Walter J. Nungester, M.D.  
Chairman  
Department of Bacteriology
